Device and playback guidance

The PDFs can be opened in a standard PDF reader or browser; the PowerPoint is optional. Both videos are MP4 files using H.264 video and AAC audio.

For best reliability, download the ZIP, extract it, and play videos locally rather than inside an email preview. On phones or tablets, individual PDFs and MP4s may be easier to open than the full ZIP.

If a video does not play in a built-in viewer, use a current media player that supports H.264/AAC MP4. Video and sound quality may vary with the recipient device.
